AVAILABLE FOR

- Remote contract-based software development
- Legacy system migration & modernization
- Technical lead role for startups or SMEs
- Custom internal tool development

SUMMARY

- 22+ years of software development experience, 10+ years working remotely
- Specializing in legacy system migration (monolith → API + ReactJS frontend)
- Fullstack development for business systems (approval workflow, inventory)
- Proficient in managing entire software lifecycle as a solo or small-team dev
- Excellent written English for documentation and async collaboration

WORK EXPERIENCE

PT Andromeda Global
Fullstack Developer
2017 - PRESENT

- **Drominder.com**, a reminder app for event that also manages its feedback
- **Drovat.com**, a tax reporting app that extracts VAT documents and manage its reporting and notification
- **DropInvoice.com**, an invoice management system
- **KartuStok.com**, an app that records the movement of goods and presents it in reports. Delivered fullstack systems with custom roles, notifications, and reports.
- **Sasa eStock Report**, manage eStock Reporting based on data warehouse for PT Sasa.
- **Invoice Distribution**, manages and distributes digital stamping invoice
- **Approval workflow system**, designed drag-and-drop form builder with dynamic validation and user preview logic. Built multi-step approval flow for document processing
